

I respectfully ask the FCC to reject the NAB petition # 04-160. Being an over the road truck driver, I find XM to be a valuable tool for me as far as the traffic and weather channels go. Also it provides entertainment that can't be found on the public airwaves. It is time to send the members of NAB a message that they cannot dictate what the people can hear, especially when they are paying to hear it. Thank you for your time.
